of documents  
for collateral  
**3 month**

**Step 3**

Issuance of a loan  
**\$100 000 000** for  
a period of **6 years**

# CRYPTO INVESTMENT

Investment **\$ 100 000**  
Average APY 20%  
The withdrawal  
of the deposit at any time  
Maximum term 6 years  
Performance Fee: 10.00%

Profits  
Monthly - **\$ 1 700**  
Yearly - **\$ 20 000**  
6 years - **\$ 120 000**  
If deposit fixed in USD

## For example

How our crypto trading works  
For example, a client signs a contract with us, invests **\$100,000** and buys 4 Bitcoins when Bitcoin is trading at **\$25,000**.  
In the contract, the client chooses whether we will pay him/her back the **\$100,000** deposit in US dollars or in **4 Bitcoins**.  
In this case, the client understands that if he/she binds the issuance of his/her deposit to Bitcoin, it carries a risk. Because Bitcoin may rise, for example, and he/she can get back **\$200,000** or more, or Bitcoin may decline and the client may get back **\$5,000** or less for his/her **\$100,000** deposit. But dividends will continue to accrue on the **\$100,000** deposit. The deposit is not used in the trading.  
That's how we are offering a risk-free investment

Investment **\$ 5 000 000**  
Average APY 20%  
The withdrawal  
of the deposit at any time  
Maximum term 6 years  
Performance Fee: 10.00%

Profits  
Monthly - **\$ 84 000**  
Yearly - **\$ 1 000 000**  
6 years - **\$ 6 000 000**  
If deposit fixed in USD

At the point of signing a contract with us, you will choose how you want to receive the invested amount and dividends. We offer our investors two options – you can withdraw either as **BTC** or **USD** on Coinbase Exchange.

## Invested-sum-in-bitcoin

For example:  
investment **1 BTC**  
withdrawal **1 BTC**  
Fixed in BTC on  
Coinbase exchange

## Invested-sum-in-dollars

For example:  
investment **\$ 100 000**  
withdrawal **\$ 100 000**  
Fixed in USD on  
Coinbase exchange
